

KoGraf

Sound-absorbing panel
The customizable acoustic solution

A sound-absorbing framework with personalized finish which allows you to elegantly hide in plain sight industrial level sound proofing and acoustic management. This brilliant idea allows you to achieve exciting sound proofing results with an elegant finish, using both fabric with a vast one range of colors or simply printing any high resolution image on it.

KoGraf - Sound-absorbing panel

Coverd has been operating successfully in the market since 1984, when it was founded its Environmental and Architectural Acoustic division. In these years we have created a highly qualified and scientific technical staff, while acquiring a profound experience and knowledge in the field, confirming our role of competence until becoming one of the leading companies in the market.

The paintings applied on the ceiling or on the walls allow to acoustically improve environments without seeing the soundproofing material applied in the underlying part so as to fully satisfies all the modern aesthetics and design needs.
